

To Whom It May Concern

Waldkraiburg, 2020

## Your Conflict Mineral Request

Valued customer,

Your question refers to an initiative of the American legislator which aim it is to discourage the black market for certain metals such as tin, tantalum, tungsten and gold from the Congo and neighbouring countries.

The initiative is not obligatory for companies outside the United States. Certainly, we support the goals of the initiative. We have and will check in periodic intervals our suppliers for these kinds of products (tinned wires, shares of weight < 1%).

After analyses of the received facts and to our best knowledge, MEDI Kabel GmbH confirms, that our products do not contain any raw materials of the above-named countries.

We would also like to point out that this is an ongoing process. Our suppliers are required to review their respective procurements sources to continuously appropriate changes.

We hope that this information satisfies your requirement.

Best Regards
