EU submission to restrict PFAS (per- and polyfluorinated alkyl substances)

Dear customer,

we would like to comment on the above topic, which is currently causing a great deal of uncertainty in the market.

MEDI Kabel GmbH supports the basic idea of restricting PFAS substances. However, we are currently still in an early stage of the restriction process. Legal decisions regarding possible restrictions at national and European level can be expected from 2025 at the earliest.

As a trading company, we only have limited material information on our products. In view of the large number of substances affected and the unclear legal situation, it is unfortunately not possible for us to give any more precise statements at the moment. If you purchase products with insulation materials made of FEP / PTFE / ETFE or similar, you must take into account that these could be affected by future regulations.

For questions regarding this issue please feel free to contact us.

Thank you for your understanding.

Best regards,
MEDI Kabel GmbH
