Information on the REACH regulation

Ladies and gentlemen,

Thank you for your inquiry regarding compliance with Regulation (EC) No. 1907/2006 (REACH).

According to Article 3 of the REACH regulation, MEDI Kabel GmbH is neither a manufacturer nor an importer of substances and preparations and does not place such on the market. Our product portfolio includes only articles. This means that the products we put on the market are not products that require registration within the meaning of the REACH Regulation (EC) 1907/2006. According to Article 7 of the REACH Regulation (EC) 1907/2006, no substances are released under normal, intended use.

In order to ensure that we, as a downstream user, do not receive any substances that are subject to notification under the REACH regulation in our products, we are in constant contact with our suppliers.

Based on the findings of the supplier information, we can confirm that no substances from the current REACH SVHC list or the appendix for substances subject to authorization are used in our products above the permitted limit values. Furthermore, we can confirm compliance with Annex XVII, provided the products are not used for toys or clothing.

However, we would like to point out that we do not carry out any specific analyses. If an obligation to provide information arises as a result of an update to the list of candidates or if the presence of a non-registered substance is found to be present, we will comply with our obligation to provide information immediately.

If you need more detailed information about the products you have purchased, please send an email to: materials@medikabel.de

Kind regards
MEDI Kabel GmbH

Markus Kep
General Manager

Stephan Langner
Material Officer
